Volume 74 1977

Table of Contents

No. 1 pp. 1–208 issued on March 15, 1977
No. 2 pp. 209–424 issued on April 1, 1977
No. 3 pp. 425–630 issued on April 15, 1977

1 Abbreviations and Symbols
The Editorial Office

7 Prostaglandin Production by Normal and Transformed 3T3 Fibroblasts in Cell Culture
S. Hammarström

13 Prostaglandin E_2 Production in 3T3 Cells Transformed by Polyoma Virus Raises the Intracellular Adenosine 3′:5′-Monophosphate Levels
H.-E. Claesson, J. Å. Lindgren, and S. Hammarström

19 RNA Methylation and Control of Eukaryotic RNA Biosynthesis. Effects of Cycloleucine, a Specific Inhibitor of Methylation, on Ribosomal RNA Maturation
M. Caboche and J.-P. Bachellerie

31 Chemical and Pharmacological Characterization of Toxic Polypeptides from the Venom of *Bungarus caeruleus*
C. Bon and J.-P. Changeux

43 Ceruleotoxin: a Possible Marker of the Cholinergic Ionophore
C. Bon and J.-P. Changeux

53 The Purification, Characterization and Partial Sequence Determination of a Trout Testis Non-histone Protein, HMG-T
D. C. Watson, E. H. Peters, and G. H. Dixon

61 Changes in the Sequence Diversity of Polyadenylated Cytoplasmic RNA during Testis Differentiation in Rainbow Trout (*Salmo gairdnerii*)
B. Levy W. and G. H. Dixon

69 Inhibition by CO of Hepatic Benzo(*a*)pyrene Hydroxylation and Its Reversal by Monochromatic Light
D. Y. Cooper, H. Schleyer, O. Rosenthal, W. Levin, A. Y. H. Lu, R. Kuntzman, and A. H. Conney

77 A Correlation between Glutathione Levels and Cellular Damage in Isolated Hepatocytes
J. Högberg and A. Kristoferson

83 Phospholipid Binding and Self-Association of the Major Apoprotein of Human and Baboon High-Density Lipoproteins
M. Rosseneu, V. Blaton, R. Vercaemst, F. Soetewey, and H. Peeters

89 Purification and Properties of Pyrazon Dioxygenase from Pyrazon-Degrading Bacteria
K. Sauber, C. Fröhner, G. Rosenberg, J. Eberspächer, and F. Lingens

99 Conformations of Purine Ribosyl 5′-Nucleotides Bound to Glycogen Phosphorylase *b*. A Proton T_2 Relaxation Time Investigation
M. Morange, A. Kolb, H. Buc, C. Chachaty, and G. Langlet

107 Interaction of RNA Polymerase with Promoters from Bacteriophage fd
P. H. Seeburg, C. Nüsslein, and H. Schaller

115 The Metabolism of *trans*-Cyclohexan-1,2-diol by an *Acinetobacter* Species
J. F. Davey and P. W. Trudgill

129 The Interaction of Phospholipid Membranes and Detergents with Glutamate Dehydrogenase. 1. Kinetic Studies
M. Nemat-Gorgani and G. Dodd

139 The Interaction of Phospholipid Membranes and Detergents with Glutamate Dehydrogenase. 2. Fluorescence and Stopped-Flow Studies
M. Nemat-Gorgani and G. Dodd

149 Purification and Comparative Properties of the Delta and Sigma Subunits of RNA Polymerase from *Bacillus subtilis*
R. Tjian, R. Losick, J. Pero, and A. Hinnebush

155 RNA Sequences in Ribonucleoprotein Fragments of the Complex Formed from Ribosomal 23-S RNA and Ribosomal Protein L24 of *Escherichia coli*
C. Branlant, J. Sri Widada, A. Krol, and J.-P. Ebel

171 The Ribitol-Phosphate-Containing Lipopolysaccharide from *Proteus mirabilis*, Strain D52. Investigations on the Structure of O-Specific Chains
J. Gmeiner

181 The "b_5-like" Domain from Chicken-Liver Sulfite Oxidase: A New Case of Common Ancestral Origin with Liver Cytochrome b_5 and Bakers' Yeast Cytochrome b_2 Core
B. Guiard and F. Lederer

191 Studies of the Interaction between Aminoacyl-tRNA Synthetase and Transfer Ribonucleic Acid by Equilibrium Partition
H. Hustedt and M.-R. Kula

199 Interacting Binding Sites of Isoleucyl-tRNA Synthetase from *Escherichia coli* Studied by Equilibrium Partition
H. Hustedt, J. Flossdorf, and M.-R. Kula

203 Ribonuclease H Levels during the Response of Bovine Lymphocytes to Concanavalin A
W. Büsen, J. H. Peters, and P. Hausen

209 Studies on the Accessability of Ribosomes to Inactivation by the Toxic Lectins Abrin and Ricin
Ø. Fodstad and S. Olsnes

217 Fourth Expansion and Glucose Perturbation of the *Dictyostelium* Kinetic Model
B. E. Wright, A. Tai, and K. A. Killick

227 Association Kinetics and Binding Constants of Nucleoside Triphosphates with G-Actin
F. Waechter and J. Engel

233 Antibodies and Autoantibodies of Glycogen Phosphorylase *b:* Inactivation of Pig and Rabbit Enzymes
S. J. Tzartos and A. E. Evangelopoulos

243 Thyrotropin Binding to and Adenylate Cyclase Activity of Porcine Thyroid Plasma Membranes
B. Verrier, R. Planells, and S. Lissitzky

253 A Nuclear Elongation Factor of Transcription from *Physarum polycephalum in vitro*
G. H. Ernst and H. W. Sauer

263 Lipopeptidophosphoglycan from *Trypanosoma cruzi*. Amide and Ester-Linked Fatty Acids
R. M. de Lederkremer, C. T. Tanaka, M. J. M. Alves, and W. Colli

269 The Molecular Defect in a Case of (Cystathionine β-Synthase)-Deficient Homocystinuria
R. Griffiths and N. Tudball

275 Characterization of Foldback Sequences in *Physarum polycephalum* Nuclear DNA Using the Electron Microscope
N. Hardman and P. L. Jack

285 An Investigation of Mistranslation *in vivo* Induced by Streptomycin by an Examination of the Susceptibility of Abnormal Proteins to Degradation
J. Hewitt and M. Kogut

293 Cathepsin L. A New Proteinase from Rat-Liver Lysosomes
H. Kirschke, J. Langner, B. Wiederanders, S. Ansorge, and P. Bohley

303 UDP-Apiose/UDP-Xylose Synthase. Subunit Composition and Binding Studies
U. Matern and H. Grisebach

313 Thymidine Uptake in Bacteria: The Effect of Purine Nucleosides
L. G. Vyacheslavov and M. I. Mosevitsky

319 Anabolic Ornithine Carbamoyltransferase of *Pseudomonas*. The Bases of Its Functional Specialization
V. Stalon, C. Legrain, and J.-M. Wiame

329 The Kinetics of Reoxidation of Reduced Benzylamine Oxidase
B. Olsson, J. Olsson, and G. Pettersson

337 Determination of the Solution Conformation of Adenosine 2′:3′-Monophosphate by Nuclear Magnetic Resonance with Lanthanide Probes
G. V. Fazakerley and M. A. Wolfe

343 Analysis of the α-Satellite DNA from African Green Monkey Cells by Restriction Nucleases
F. Fittler

353 The Immunochemistry of Peptidoglycan. Antibodies against a Synthetic Immunogen Cross-Reacting with an Interpeptide Bridge of Peptidoglycan
P. H. Seidl and K. H. Schleifer

365 Studies of Glutamate Dehydrogenase. Analysis of Quaternary Structure and Contact Areas between the Polypeptide Chains
I. R. Rasched, A. Bohn, and H. Sund

379 Studies of Glutamate Dehydrogenase. Methionine-169: the Preferentially Carboxymethylated Residue
M. David, I. R. Rasched, and H. Sund

387 Snake Venom Toxins. The Amino-Acid Sequences of Three Toxins (9B, 11 and 12A) from *Hemachatus haemachatus* (Ringhals) Venom
F. J. Joubert

397 Transport of Hexoses across the Liver-Cell Membrane
H. Baur and H. W. Heldt

405 Poly(A)-Containing RNA in Neuroblastoma: Immature and Differentiated Cells in Culture
B. Croizat, F. Berthelot, A. Felsani, and F. Gros

413 A Mathematical Model for the Influence of Anionic Effectors on the Phosphofructokinase from Rat Erythrocytes
M. Otto, R. Heinrich, G. Jacobasch, and S. Rapoport

421 Least-Squares Analysis of Circular Dichroic Spectra of Proteins
R. G. Hammonds, Jr

425 Aminopeptidase N from *Escherichia coli*. Unusual Interactions with the Cell Surface
M. Murgier, C. Pelissier, A. Lazdunski, A. Bernadac, and C. Lazdunski

435 On the Nature of Chromophore in Pig Kidney Diamine Oxidase
A. Finazzi Agrò, P. Guerrieri, M. T. Costa, and B. Mondovì

441 4-Amino-hex-5-enoic Acid, a Selective Catalytic Inhibitor of 4-Aminobutyric-Acid Aminotransferase in Mammalian Brain
B. Lippert, B. W. Metcalf, M. J. Jung, and P. Casara

447 Poly(4-thiouridylic Acid) as Messenger RNA and Its Application for Photoaffinity Labelling of the Ribosomal mRNA Binding Site
I. Fiser, K. H. Scheit, and E. Kuechler

457 Deoxyribonuclease Activity Associated with Adenovirus 5 and 7
C. Cajean-Feroldi, Y. Chardonnet, and J. Chantepie-Auray

463 Properties of ATPase Activity in Coupling Factor from *Chromatium* Strain D Chromatophores
A. Gepshtein and C. Carmeli

471 Chemical Studies on Yeast Hexokinase. Specific Modification of a Single Tyrosyl Residue with 1-Ethyl-3-(3-Dimethylaminopropyl)Carbodiimide
M. Grouselle and J. Pudles

481 Methionyl-tRNA Synthetase from *Escherichia coli*: Substituting Magnesium by Manganese in the L-Methionine Activating Reaction
F. Hyafil and S. Blanquet

495 Biosynthesis of Cyclopentenyl Fatty Acids. Cyclopentenylglycine, a Non-Proteinogenic Amino Acid as Precursor of Cyclic Fatty Acids in *Flacourtiaceae*
U. Cramer and F. Spener

501 Structural Studies on Periodate-Oxidized Chicken Ovomucoid. Spectral Behaviour of the Tyrosine Residues
M. A. Krysteva and I. D. Dobrev

509 Spectroscopic Studies on Effector-Induced and Substrate-Induced Conformation Changes of Phosphofructokinase
R. Grosse, K. Eckert, M. Otto, G. Jacobasch, and K. R. H. Repke

521 Mitochondrial Heredity of Resistance to 3-(3,4-Dichlorophenyl)-1,1-dimethylurea, an Inhibitor of Cytochrome *b* Oxidation, in *Saccharomyces cerevisiae*
A.-M. Colson, L. The Van, B. Convent, M. Briquet, and A. Goffeau

527 The Superhelical Density of Nuclear DNA from Human Cells
P. R. Cook and I. A. Brazell

533 Are the Aerobic and Anaerobic Phosphofructokinases of *Escherichia coli* Different?
J. Babul, J. P. Robinson, and D. G. Fraenkel

539 Cooperative and Antagonistic Interactions of Peptidyl-tRNA and Antibiotics with Bacterial Ribosomes
A. Contreras and D. Vázquez

549 Synergistic Interaction of the Streptogramins with the Ribosome
A. Contreras and D. Vázquez

553 The Purification and Properties of NADP-Dependent Isocitrate Dehydrogenase from Ox-Heart Mitochondria
N. Macfarlane, B. Mathews, and K. Dalziel

561 Measurement of Progesterone and Pregnenolone 16α-Hydroxylase Activities by a Tritium-Exchange Method
J. de Graeve, P. Kremers, and J. E. Gielen

567 Role of Divalent Ions in Folding of tRNA
J.-L. Leroy, M. Guéron, G. Thomas, and A. Favre

575 The Reduction by Dithionite of Fe(III) Myoglobin Derivatives with Different Ligands Attached to the Iron Atom. A Study by Rapid-Wavelength-Scanning Stopped-Flow Spectrophotometry
R. P. Cox and M. R. Hollaway

589 Complexity of the Structure of Particles Containing Heterogeneous Nuclear RNA as Demonstrated by Ribonuclease Treatment
J. Stevenin, H. Gallinaro-Matringe, R. Gattoni, and M. Jacob

603 The Purification and Properties of Human α_1-Antitrypsin (α_1-Antiprotease), Variant Z
A. Hercz and M. Barton

611 Stimulatory and Inhibitory Effects of Dimethyl Sulfoxide and Ethylene Glycol on ATPase Activity and Calcium Transport of Sarcoplasmic Membranes
R. The and W. Hasselbach

623 Extracellular Protein A from a Methicillin-Resistant Strain of *Staphylococcus aureus*
R. Lindmark, J. Movitz, and J. Sjöquist

629 Correction
